

revisions and final approval of proofs. We confirm that we have provided a current, correct email address which is accessible by the Corresponding Author.

**Agreement with the article's content:** We declare that all authors have read the manuscript, agree with its wording, and consent to its submission to the *Anesteziologie a intenzivní medicína* journal's editorial office. **Authors' contributions:** Muhammad Khaerul Maarif: Concept and study design, data collection, data analysis and interpretation, manuscript drafting, critical revision of the manuscript, final approval of the manuscript before publication. AM Takdir Musba: Concept and study design, data analysis and interpretation, manuscript drafting, critical revision of the manuscript, final approval of the manuscript before publication. Madonna D Datu: Concept and study design, data analysis and interpretation, manuscript drafting, critical revision of the manuscript, final approval of the manuscript before publication. Syafruddin Gaus: Data analysis and interpretation, manuscript drafting, critical revision of the manuscript, final approval of the manuscript before publication. Nur Surya Wirawan: Data analysis and interpretation, manuscript drafting, critical revision of the manuscript, final approval of the manuscript before publication. Andi Adil: Data analysis and interpretation, manuscript drafting, critical revision of the manuscript, final approval of the manuscript before publication. **Funding:** In this research, we did not use any financial assistance from any particular party or sponsorship.

**Acknowledgements:** We would also like to extend our gratitude to all participants and colleagues who contributed their time, insight, and expertise to this research. **Registration in databases:** All data collected in this study will be kept confidential and used solely for research purposes. Participants' identities were anonymized with a unique code, and no personally identifiable information was disclosed at any stage of the study. Data were securely stored in a password-protected digital file, accessible only to the research team. Participant confidentiality was maintained in accordance with institutional policies and applicable data protection regulations. **Ethics committee consideration:** The study protocol complies with the Declaration of Helsinki and has been approved by the Research Ethics Committee of Hasanuddin University (No.: 1010/UN4.6.4.5.31/PP36/2024). Each participant gave written informed consent and agreed to participate in this study.
